

simplythick® | EasyMix™

PREPARING SIMPLYTHICK® EASYMIX™ WITH SODA POP¹

What you'll need:

SimplyThick® EasyMix™ Bottle & Pump

Cold Soda Pop²

1-Mixing Container³

1-Pre-stirring Container

Mixing Utensil (Fork or Spoon)

IMPORTANT NOTES:

¹ Thickening soda is difficult with any thickener. This is our recommended method to minimize foam and to maximize the carbonation feel. You can use any method that you like.

² COLD soda pop works best. But this method is effective with warm soda pop, too.

³ The containers must be large enough for at least 2" of head space above the liquid level.

⁴ If you are uncertain how much SimplyThick EasyMix to use, please consult a mixing chart (Reference Pub 4).

⁵ SLOWLY stirring means mixing so that your spoon or fork only makes one revolution per second.

Pre-stirring
Container

Mixing
Container

Pour soda pop into container used for pre-stirring.

1 Dispense appropriate amount of SimplyThick EasyMix into mixing container.⁴

5 seconds

Pre-stir the soda pop in pre-stirring container for 5 seconds. Then allow the fizz to die down.

2

Pour the pre-stirred soda pop into the mixing container.

3

45 seconds

Stir SLOWLY, at about half speed for 45 seconds.⁵

4

Serve immediately, with or without thickened ice cubes.
